INTRODUCTION

As per the education reform initiative and as approved by the Education Reform Steering Committee in mid 2022, the year-end class VIII assessment was upgraded to a common examination from the academic year 2022.

With this change in class VIII assessment policy, the earlier practice of school level test administration, evaluation and result declaration was discontinued and BCSEA has taken over the conduct and evaluation as executed for the board examinations. This will promote rigorous and credible common examination system for enhancement of students' learning outcomes at this grade level.

Hence this is the first edition of the Pupil Performance Report for Common Examination Class VIII. This report will be published annually to provide feedback to schools, teachers and other stakeholders on the candidates' performance in the common examinations to obtain reliable data on student performance at key stage III for early interventions.

Some of the main features of this report besides the overall national, dzongkhag-wise and school-wise performance of our students who appeared the examination with regard to pass percentage, mean scores and also gender difference in performance in all subjects are:

- highlights of the examination;
- passing criteria for the examination;
- number of candidates who passed in CA and Theory components by gender;
- number of candidates who were not awarded pass certificate due to the criterion of passing mandatorily in Dzongkha, English and Mathematics;
- chapters on Conduct of examination, Management and Marking of answer scripts, and Clerical recheck outlines the number of participants involved in each activity, explains the processes to assess the standard of candidates' achievement at the end of key stage III.

The BCSEA would like to thank all the Dzongkhag/Thromde Education Office, Principals, school management, Supervising Examiners and Invigilators for their unwavering support in conducting the examination safely and successfully.

Further, we would also like to thank the teachers and other participants who attended the Examination Marking Camp.

We look forward to providing similar reports to provide meaningful feedback to support the teaching learning process and to the policy makers.

We wish our schools, teachers and students a safe and successful academic year 2023.

CHAPTER 2 CONDUCT OF EXAMINATIONS

The 2022 common examination in theory started on December 19 and concluded on December 31.

OVERALL INFORMATION

- Total centres: 176 schools (168 government and 8 private schools).
- Total Supervising Examiners (SE) deployed: 144 teachers (some of the SE conducted examinations in centres with BCSE, BHSEC, LCSC and VIII courses). Class VIII students from 19 lower secondary schools were instructed to appear for their examination from nearby higher secondary schools and middle secondary schools. This was done to minimize expenditure on the conduct of examinations.
- BCSEA officials and Dzongkhag / Thromde Education Officials extended support for the smooth and fair conduct of the examination.

3.2 ANSWER SCRIPT MANAGEMENT

This activity starts two days before the marking of the answer scripts. During this process, the examination materials from the centres are handed over by the Camp Coordinator of the Marking venue to the Chief Manager. This is followed by preparing the answer scripts for marking by the

managers. Unlike previous years, this year the administrative numbers and lot numbers were generated by the Tabulation System. Administrative number assigned for each candidate is written on the specified space on the cover page of each subject/paper and the attached leaflet with the candidate's identity removed. This maintains confidentiality and ensures fairness in marking. Then the answer scripts are kept ready for issuing to marking rooms by arranging them into lots with each lot containing about 50 number of answer scripts.

3.3 MARKING

- Before the marking begins, the model answers and the marking schemes are thoroughly discussed and standardised in subject groups;
- The respective chief markers are responsible for the movement of answer scripts from the management to the marking rooms;
- To maintain consistency in marking and reduce subjectivity, the markers assess the same items for the population who appeared the examination;
- To ensure accuracy of marks awarded for each item, the marked answer scripts are further cross checked and verified that all items are corrected;
- To ensure consistency in marking and the award of marks, the chief markers conduct random re-evaluation of marked answer scripts providing feedback to the markers;
- Then the marked answer scripts are compiled in ascending order and handed over for item tabulation. This ensures zero error in the award of marks by the markers and
- The Examination and Assessment Officers provide logistic and professional support to their respective subject groups during the marking process.

3.4 TABULATION

Double entry of marks from the marked answer scripts was initiated in the year 2018 to ensure accuracy. Starting this year, new tabulation system was implemented for the capture of examination data. This involves two independent entries of marks from the marked answer scripts into the system by the tabulators:

Item Tabulation

- Item tabulators enter all the candidates' marks item wise for each subject. This ensures all marks are entered item wise and additions done correctly.

Mark tabulation

- Mark tabulators enter the totalled marks for each question from the cover page against each candidate's admin number.

The tabulators don't punch in the index numbers. Barcode reader scans the barcode of the index number on the cover page and the admin number is extracted from the system which pops up automatically. Against this admin number the item tabulators and mark tabulators enter the mark. This ensures confidentiality of the candidates.

Validation of Total Marks

Tabulation system automatically flags the candidate's paper if the total marks entered by the item tabulators and mark tabulators do not match. If the error is with item tabulation, the paper is sent to item tabulators for rectification and if the error is with mark tabulation, error is rectified by the mark tabulator. Only when the total marks match, the mark tabulator can save the marks for the result processing. This ensures that marks entered correspond to the correct index number minimising human error and 100% accurate results for the candidates.
